

**HIGHLY EFFECTIVE
FIRE SUPPRESSION.**

GREENPORT FST

- Expands volumetrically, flooding the space, suppressing the flames and reducing the temperature of the fire within seconds
- Extinguishes up to 100m³
- Quick and simple to deploy
- Highly portable and safe
- Creates a high degree of capability for all personnel with minimum training
- Allows for rapid response, minimising fire damage
- Greatly minimises damage caused by water or foam from fire hoses
- Environmentally friendly
- No servicing required
- 15 year shelf life

CERTIFIED FOR FIRE CLASSES:

Recommended for use in buildings & other structures

Used by first responders, firefighters, police and armed forces, the Greenport FST is highly effective in the fight against early-stage and fully-developed fires.

In addition to application by armed and emergency forces, the Greenport FST is also suitable for maritime, mining and construction industries.

The non-pressurised Greenport FST is deployed manually by pulling a pin that activates the internal electronic ignition system, or by using a thermal probe for automatic activation.

Once triggered, the Greenport FST generates an aerosol mist, which expands volumetrically, flooding the space, suppressing the flames and reducing the temperature of the fire within seconds.

Ideal for:

- ✓ **Firefighters**
- ✓ **Police**
- ✓ **First Responders**
- ✓ **Military**
- ✓ **Maritime**
- ✓ **Mining**
- ✓ **Industry**
- ✓ **Rest Homes**
- ✓ **Hospitals**
- ✓ **Retirement Villages**
- ✓ **MORE**
